Colder Products Company Announces Genderless Single-Use AseptiQuik Product Line Extension

St. Paul, Minn. – Oct. 3, 2012 – [Colder Products Company](http://www.colder.com), the leader in the design and manufacture of single-use connection technology and connectors for the life science market, announces the availability of genderless [AseptiQuik® S](#) 1/8-inch and 1/4-inch small format connectors. AseptiQuik S provides quick sterile connections for small flow applications in an easy-to-use design with reliable performance, without the need for clamps, fixtures or tube welders.

“It is exciting to offer the first genderless sterile connector that does not require any secondary equipment to secure the connector,” said Todd Andrews, business development engineering manager, bioprocessing markets for Colder Products Company. “This connector brings ease-of-use to a whole new level.”

The intuitive “FLIP-CLICK-PULL” design of AseptiQuik S enables users to quickly transfer valuable media easily with less risk of operator error. The connector includes integrated protective pull-tab covers, reducing part complexity and ensuring simultaneous removal of both membranes. [Watch the AseptiQuik S Connectors video.](#)

Applications for AseptiQuik S can include single-use bioreactors, cell banking and a wide range of sampling applications. Offered in both gamma and high temperature versions, terminations available and ready-to-ship for immediate implementation include 1/8-inch hose barb, 1/4-inch hose barb and 3/4-inch sanitary.
